Welt Pocket Pattern Guide

This guide accompanies your welt pocket pattern.

Inside this package, you'll find two pocket styles:

- **Type A** — Small Welt Pocket (pg. 2)
Perfectly sized for IDs, credit cards, and folded cash.

Note: Designed for vertical placement inside the upper chest area of a garment, this welt opening sits slightly lower from the top seam. This intentional positioning allows the pocket to join smoothly with an inner front facing seam while preserving easy, comfortable access.
- **Type B** — Large Welt Pocket (pg. 3)
Designed to comfortably fit a phone, passport, and slim wallet.

Choose the type that aligns with your design vision — both are constructed using the same method.

Fabric Recommendation

For best results, use **non-stretch lightweight fabrics with structure** or **midweight woven fabrics**. A stable fabric allows the welt opening to remain sturdy and durable over time.

Printing Instructions

1. Print at **100% scale**.
Do **not** select “Fit to Page.” Choose **Actual Size** or **100%** in your print settings.
2. After printing, measure the 1-inch test square to ensure it measures exactly 1 inch.

Cutting Instructions

1. Cut along the **outer solid line**. The **inner dashed lines** indicate the sewing lines. (The $\frac{1}{2}$ " seam allowance is already included and clearly labeled.)
2. Cut **one piece on the fold**, as indicated.
3. Carefully **transfer the welt opening pattern marking** to your fabric after cutting.

The marking guides placement and stitching — taking a moment to mark accurately will make the construction process smooth and intuitive.
